Index

Symbols

{{ }} syntax 54
{% %} syntax 54

A

access token 124
Amazon EC2
  reference link 186
APIRouter class
  used, for multiple routing 19-22
authentication methods, FastAPI
  basic HTTP authentication 122
  bearer token authentication 122
  cookies 122

B

beanie library
  using 104
bearer tokens 122
Body() class 31

C

create_engine() method 93
CREATE endpoint
  testing 163-166
CRUD endpoint
  testing 160, 161
CRUD operations
  about 110
  create 110
  delete 112
  methods 105
  read 110, 111
  routes/events.py 112-114
  routes/users.py 114-120
  update 111
CRUD todo app
  building 37-41

D

database
  creating 92-97
  events, creating 97-99
  events, deleting 102-104
  events, reading 99, 100
  events, updating 101, 102

DELETE endpoint
  testing 168-171
dependency injection
  about 123
  creating 123, 124
  using 123, 124
Depends class 98
deployment preparation,
    FastAPI applications
  about 176
  dependencies, managing 176, 177
  environment variables, configuring 177
Docker
  about 13
  deploying with 178
  FastAPI applications,
    deploying with 178
  installation link 14
  setting up 13
Dockerfile
  about 14
  writing 178, 179
Docker Hub 14
Docker images
  building 180, 181
  databases, deploying 187
  deploying 186, 187
documents 104
DRY (don't repeat yourself) 58

E

error handling 48-51
event document class
  updating 140-145
event document routes
  updating 140-145
event planner application
  building 73, 74
event routes
  updating 136-140

F

FastAPI
  about 21
  authentication methods 122
  Jinja templates, using 58-67
  routing 18
  routing, example 18, 19
FastAPI application
  building 15, 16
  deploying locally 181-183
  deploying, with Docker 178
  event document class and routes,
    updating 140-145
  event planner application,
    building 73, 74
  event routes, updating 136-140
  models, implementing 74-77
  routes, implementing 78
  running 183-185
  securing, with JWT 124, 125
  securing, with OAuth2 124, 125
  structuring 72, 73
  updating 133
  user sign-in route, updating 133-136
FastAPI Automatic Docs
  about 31
  ReDoc 34-36
  Swagger 32, 33
FastAPI responses
  about 44
  response body 44

response header 44
status codes 44, 45
filters
about 54
conversion filters 55
default filter 55
escape filter 55
join filter 55
length filter 55
filters, in Jinja
reference link 56

G

Git
about 4
branch 8
download link 4
installing 4
operations 5-8
Git documentation
reference link 8
Google Cloud Run
reference link 186

H

HS256 algorithm 131
HTTP exception 48
HTTPException arguments
detail 49
headers 49
status_code 49
HTTP request methods 18
HTTP status codes
reference link 45

I

if statements
using 56
isolated development environments
creating, with Virtualenv 9

J

Jinja
about 54
filters 54
if statements, using 56
loops 56
macros 57
template inheritance 58
Jinja's, template inheritance
reference link 58
Jinja templates
using, in FastAPI 58-67
JSON Schema 34
JSON Web Token (JWT)
about 124
creating 129-132
FastAPI application, securing
with 124, 125
need for 124
verifying 129-132

L

loops 56

M

macros 57
main branch 8
Microsoft Azure deployment
  reference link 186
MongoDB
  database, initializing 106-109
  documents 104, 106
  setting up 104
MongoDB atlas
  reference link 187
multiple routing
  with APIRouter class 19-22

N

non-existent todo
  retrieving 51

O

OAuth2
  application, securing with 125
  FastAPI application, securing with 124
Object Document Mapper (ODM) 104

P

package management
  with pip 11, 12
Path class 30
path parameters 27-30
pip
  about 12
  basic commands 13
  installation link 13
  installing 12, 13
  package management with 11, 12
primary key 91
push and pull operation 14
Pydantic models
  nested models 26, 27
  used, for validating request bodies 23-26
pytest
  unit testing with 150-153
pytest fixtures
  repetition, eliminating with 153, 154

Q

query parameters 30

R

READ endpoint
  testing 161-163
ReDoc 34-36
REST API endpoints
  CREATE endpoint, testing 163-166
  CRUD endpoint, testing 160, 161
  DELETE endpoint, testing 168-171
  READ endpoint, testing 161-163
  sign-in route, testing 158-160
  sign-up route, testing 157
  tests, writing 156
  UPDATE endpoint, testing 166-168
request bodies
  about 30, 31
  validating, with Pydantic models 23-26
response header 44
response models
  building 45- 48

routes
  about 18
  event routes, implementing 83-87
  implementing 78
  user routes, implementing 78-82

S

schemas 22
Session class
  methods 92
sign-in route
  testing 158-160
sign-up route
  testing 157
SQLModel
  rows 91, 92
  Session class 92
  setting up 90
  tables 90, 91
Swagger 32, 33

T

template inheritance 58
test coverage report
  generating 171-174
test environment
  setting up 154-156

U

unit testing
  with pytest 150-153
UPDATE endpoint
  testing 166-168
user authentication
  handling 132, 133
user passwords
  hashing 125-129
user sign-in route
  updating 133-136
uvicorn tool 18

V

validation 23
variable block 54
Virtualenv
  used, for creating isolated
    development environments 9
virtual environment
  about 9
  activating 9, 10
  creating 9
  deactivating 10, 11
